Computational Statistics & Data Analysis 4 (1986) 283–284
North-Holland

Author Index Volume 4 (1986)

(The issue number is given in front of page numbers)

Antoniadis, A. and **J. Berruyer**, On estimating the number of components in a finite mixture of power series distributions [1] (4) 229–241
Asselain, B., see **A. Ciampi** (3) 185–204

Belsley, D.A. and **R.W. Oldford**, The general problem of ill conditioning and its role in statistical analysis [1] (2) 103–120
Berruyer, J., see **A. Antoniadis** (4) 229–241
Birkes, D. and **Y. Dodge**, The number of minimally connected block designs [1] (4) 269–275

Carter, R.L., M. Feuerstein and **J.T. Love**, Repeated measures regression: An application to the analysis of mood and chronic pain [2] (2) 131–140
Chavas, J.-P., Recursive instrumental variable estimation of simultaneous equations with autoregressive disturbances [1] (3) 159–166
Chen, J. and **H. Rubin**, Drawing a random sample from a density selected at random [1] (4) 219–227
Choi, S.C., Truncated group sequential test for clinical trials [1] (2) 121–129
Ciampi, A., J. Thiffault, J.-P. Nakache and **B. Asselain**, Stratification by stepwise regression, correspondence analysis and recursive partition: A comparison of three methods of analysis for survival data with covariates [2] (3) 185–204
Dodge, Y., Classification of minimally connected 2^3 factorial experiments [1] (3) 147–158
Dodge, Y., see **D. Birkes** (4) 269–275
Feuerstein, M., see **R.L. Carter** (2) 131–140
Gomes, M.I., Penultimate versus ultimate in statistical theory of extremes – A simulation study [1] (4) 257–267
Kafadar, K. and **C.H. Spiegelman**, An alternative to ordinary q–q plots: Conditional q–q plots [1] (3) 167–184
Kalaba, R. and **L. Tesfatsion**, Nonlocal sensitivity analysis, automatic derivative evaluation, and sequential nonlinear estimation [1] (2) 79–91
Lee, S.-Y., Analysis of conditional covariance structure models [1] (1) 41–59
Love, J.T., see **R.L. Carter** (2) 131–140
Marco, V.R., see **D.M. Young** (4) 243–255
Nakache, J.-P., see **A. Ciampi** (3) 185–204
Odell, P.L., see **D.M. Young** (4) 243–255
Oldford, R.W., see **D.A. Belsley** (2) 103–120
Rubin, H., see **J. Chen** (4) 219–227
Rust, P.F., Programming common distributions for precise *P*-values [3] (3) 205–209
Sheather, S., An improved data-based algorithm for choosing the window width when estimating the density at a point [3] (1) 61–65
Spiegelman, C.H., see **K. Kafadar** (3) 167–184

[1] Appeared in Section I (Methodology).
[2] Appeared in Section II (Applications and Comparative Studies).
[3] Appeared in Section III (Notes).
